

Caterlite

Induction Cooker Instruction manual

Model
CM352-A

Safety Instructions

- Position on a flat, stable surface.
- A service agent/qualified technician should carry out installation and any repairs if required. Do not remove any components on this product.
- Consult Local and National Standards to comply with the following:
 - Health and Safety at Work Legislation
 - Fire Precautions
 - Wiring Regulations
 - Building Regulations
- **Caution! Hot surface!**
- DO NOT immerse the appliance in water.
- DO NOT leave the appliance unattended during operation.
- DO NOT move the appliance during cooking or with hot cookware on top of it.
- DO NOT place empty cookware on the appliance.
- DO NOT place any magnetic objects on the glass surface during operation.
- DO NOT place metal objects/utensils on the appliance as they may become hot during operation.
- People with a pacemaker fitted should not use the appliance and keep a minimum of 60cm from the appliance during operation.
- Always switch off and disconnect the power supply to the appliance when not in use.
- Not suitable for outdoor use.
- If the glass surface is cracked disconnect from the power supply and consult your Caterlite agent or recommended qualified technician.
- Keep all packaging away from children. Dispose of the packaging in accordance to the regulations of local authorities

- If the power cord is damaged, it must be replaced by a Caterlite agent or a recommended qualified technician in order to avoid a hazard.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Caterlite recommend that this appliance should be periodically tested (at least annually) by a Competent Person. Testing should include, but not be limited to: Visual Inspection, Polarity Test, Insulation Continuity and Functional Testing.
-  non-ionizing electromagnetic radiation.

Introduction

Please take a few moments to carefully read through this manual. Correct maintenance and operation of this machine will provide the best possible performance from your Caterlite product.

Pack Contents

The following is included:

- Caterlite Induction Cooker
- Instruction manual

Caterlite prides itself on quality and service, ensuring that at the time of unpacking the contents are supplied fully functional and free of damage.

Should you find any damage as a result of transit, please contact your Caterlite dealer immediately.

Induction Cooking

Induction cooking is a very efficient method of cooking as it reduces heat loss between the pan and the atmosphere by as much as 40%. This makes it extremely energy efficient, as well as offering immediate heat-up, unlike traditional heating methods which require time to get to temperature.

The Induction cooker works by creating a magnetic field within suitable cookware, which causes an instant build-up of heat to cook the food.

Induction hobs can make a variety of noises for different reasons. Crackling and whistling noises are often due to the construction of the pan or any utensil in it. Quiet humming noises are due to the induction technology and are completely normal. The cooling fans for the electronics may also be heard.

Installation

Maintain a distance of 10cm (5 inches) between the appliance and walls or other objects

Cookware

Suitable cookware includes:

- All magnetic pans such as Vogue Stainless Steel or Triwall pans.
- Mild steel or plain steel (black iron) pans
- Enamelled/non-enamelled cast iron and iron pans
- Cookware diameter: 12cm - 26cm

Unsuitable cookware includes:

- Cookware with a diameter of less than 12cm
- Ceramic or glass cookware
- Stainless steel with no/weak magnetism, aluminium, bronze or copper cookware unless marked as suitable for induction cooking
- Cookware with feet
- Cookware with a rounded bottom (e.g. wok)

Control Panel

Operation

1. Connect the appliance to the mains power supply.
2. Place suitable cookware on to the centre of the glass plate.
3. Standby' light will flash. Press On/Off button and 'Heating' light will flash. Press Select button and your appliance will start to work.

The Induction Hob will work by either running at a Power level or a Temperature. When running at a fixed temperature, the power to the pan will reduce as the pan heats up.

4. Press the Select button to cycle between the Power and Temperature functions.
5. Press the Increase or Decrease button to change the level of each function.

Function	Level	Increments	Default
Power	500w to 2000w	200w/300w	1200w
Temperature	60°C to 240°C	20°C	180°C
Timer	0 to 180min	5min	0min

NOTE: If unsuitable cookware or no cookware is present the induction cooker will display 'E0' for 30 seconds before switching off.

- To use the timer press the timer button. The LCD display will switch to Timer and the Timer indicator will illuminate and flash. Press the Increase or Decrease button to change the timer. The Timer indicator will flash while the timer is in use. When the timer finishes the hob will switch off.
- To lock the control panel, press the Lock button. To unlock, press and hold the lock button.
- This appliance has an overheat protection function. If the pan becomes too hot the appliance will switch off, a buzzer will sound and the display will show "E2". Should this happen, wait for 10 minutes to allow the appliance to cool before restarting, as above.
- Fan will continue to run while the glass surface temperature is over 80°C.

Cleaning, Care & Maintenance

Disconnect from the power supply and allow the appliance to cool before cleaning.

- Use warm, soapy water and a damp cloth to clean the appliance.
- DO NOT use abrasive cleaners or pads.
- Dry thoroughly after cleaning.

Troubleshooting

A qualified technician must carry out repairs if required.

Fault	Probable Cause	Solution
The unit is not working	The unit is not switched on	Check the unit is plugged in correctly and switched on
	Plug or lead is damaged	Replace Plug or lead
	Mains power supply fault	Check mains power supply
"E0" on Display	Unsuitable cookware / no cookware	Replace with suitable cookware
"E2" on Display	Appliance has overheated	Allow to cool for 10 minutes before restarting

Technical Specifications

Note: Due to our continuous improvement process, the product specifications are subject to change without notice.

Model	Voltage	Power (max.)	Current	Power range	Temperature range	Dimensions h x w x d (mm)	Weight
CM352-A	220-240V~ 50Hz	2000W	8A	500-2000W	60-240°C	45 x 295 x 370	2.6kg

Electrical Wiring

The plug is to be connected to a suitable mains socket.

This appliance is wired as follows:

- Live wire (coloured brown) to terminal marked L
- Neutral wire (coloured blue) to terminal marked N

If in doubt consult a qualified electrician.

Electrical isolation points must be kept clear of any obstructions. In the event of any emergency disconnection being required they must be readily accessible.

Compliance

The product must not be disposed of as household waste. To help prevent possible harm to human health and/or the environment, the product must be disposed of in an approved and environmentally safe recycling process. For further information on how to dispose of this product correctly, contact the product supplier, or the local authority responsible for waste disposal in your area.

Caterlite parts have undergone strict product testing in order to comply with regulatory standards and specifications set by international, independent, and federal authorities.

Caterlite products have been approved to carry the following symbol:
